Disciplined Software Engineer committed to continuous learning and driven to contribute to business growth through high performance, maintainable systems. eager to scale my expertise to deliver the architectural integrity and operational efficiency required for our collective success.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor's degree in Management Information Systems, *Higher Institute of Management Science* June 2025
GPA: 3.0/4.0 (Very Good).

Introduction to Generative AI for Software Development, DeepLearning.AI

May 2026

SKILLS

Languages: Java, SQL, PL/SQL.

Frameworks: Spring Framework, Spring Boot, Spring Web, Spring Security, JWT, Jakarta Persistence (JPA), Hibernate, Spring Data JPA.

Database: MySQL, PostgreSQL.

Developer Tools: Docker, Git, Linux, Maven.

Concepts & Methodologies: Design Patterns, RESTful API Design, Database Design, Query Optimization, Normalization/De-Normalization, Performance Tuning (Indexing), System Analysis and Design, Unit Testing.

Other: HTML, CSS, JavaScript, TypeScript, Angular, LLM Assisted Development.

PROJECTS

Food Delivery Backend Platform

Tech Stack: Java 21, Spring Boot 3+, Spring Data JPA, PostgreSQL, Spring Security, Docker, Docker Compose, Maven, Git.

- **Contributed** to the development, and analysis of a feature-based platform (**Restaurants, Carts, Orders**) within a team environment, adhering to a strict **Main/Dev/Feature** Git branching model.
- **Collaborated** on building the foundational relational schema and DDL scripts, implemented core **Spring Data JPA** entities and repositories, and participated in peer **code reviews** and **refactoring**, and writing **unit tests** to maintain system integrity.
- **Containerized** the application and database infrastructure utilizing **Docker & Docker Compose** to establish a uniform development environment and facilitate seamless team collaboration.

E-Commerce Backend Platform

Tech Stack: Java 17, Spring Boot 3+, Spring Data JPA, Spring Security, Spring Email, Docker, Docker Compose, Maven, Git.

- Developed a **Spring Boot 3** e-commerce REST API, enabling product browsing, cart management, and secure checkout. Integrated **Spring Email** to automate welcome and order confirmation emails.
- Secured API endpoints using **JWT** and **RBAC**, enforcing role-based access control to protect sensitive data.
- Containerized the application stack using **Docker Compose** for simplified deployment of API, and **PostgreSQL**.
- Built a global exception handler standardizing error responses across all Spring Boot API endpoints.

Database Design & Optimization

Tech Stack: PostgreSQL, MySQL, Git.

- Engineered a **PostgreSQL** relational schema for 50M+ records, used **EXPLAIN ANALYZE** to identify bottlenecks and applied B-Tree indexing, reducing query latency by **98.8%** (613ms → 7ms)

- Built a denormalization layer maintained by **PL/pgSQL** triggers, achieving a **99.9% performance improvement** on analytical revenue queries
- Validated schema decisions through MySQL benchmarking on 6M records, demonstrating a **119% increase in QPS** via composite indexing

LANGUAGE

Arabic (fluent speaker)

English (Very Good)
